

Course Description

PCI DSS, the results of the convergence of Visa, Master Card, American Express and other payment brands respective security standards, is here to stay. More so, Visa and MasterCard are fining institutions that process/store/transmit payment data for lack of compliance. PCI DSS impacts all companies that process/store/transmit payment card information.

This A-Z training on PCI DSS is based on PCI Internal Security Assessor (ISA) methodology and attendees are equipped with similar knowledge as an ISA. As a result, attendees are able to maintain and facilitate PCI DSS corporate implementation. It is a 2 day intense training with an exam on the last day; **attendees should have an ICT or audit/control or project management background.**

Target

Information Security Professionals, Auditors, CISO (Chief Information Security Officer) and ISM (Information Security Manager).

This training will be applied by a QSA (Qualify Security Advisor) company recognized by the Payment Card Industry Data Security Standard
